Properties

Handsprayer universal: transparent snake housing with scaling on the side for measuring the filling volume and/or the mixing ratio. The spray nozzle is adjustable from jet to mist.

Profi pressure sprayer: easy and fast pressure build-up realized by pumping with a pump rod with safety valve in order to prevent excess pressure. Constant mist, with fineness that can be regulated by turning the nozzle nut.

Pressure sprayer universal: large filling volume and pressure release on the side. Individually adjustable spray pattern.

Foamer: large filling volume and pressure release on the side. The mounted foam nozzle produces a stable and cleaning-active foam.
