

F.L.™ Spray

Silicone-free all-round release agent

The benefits at a glance

- NSF-H1 registered
- Applicable at high mould temperatures
- Silicone-free
- Very thin, highly efficient separating film
- Easy removability
- Usable for a multitude of plastics

Properties

Rivolta F.L. TM is a fully synthetic high performance release agent which fulfils the high hygiene requirements for plastic injection moulding parts for the application in the food, pharmaceutical, cosmetics, tobacco and feed industry.

F.L. TM as mould-protecting highly-efficient allround release agent enables to demould easily in the plastic processing of thermoplastics, thermosetting plastics and elastomers.

Form	liquid
Colour	transparent
Odour	neutral

Fields of application

- Silicone-free allround release agent for the production of plastics
- Parts for the food, pharmaceutical and feed industry
- Parts of sensitive plastics, such as e.g. PC, ABS etc.
- Parts which are varnished, marked, stuck together or metallized
- Moulding temperatures up to approximately +140 °C
