

RoHS

The EU Directive 2011/65/EC lays down rules on the **Restriction of Hazardous Substances** (= RoHS) in electrical and electronic equipment with a view to contributing to the protection of human health and the environment. Directive 2011/65/EU (RoHS 2) replaced the precursor Directive 2002/95/EC (RoHS 1) on 3 January 2013.

The following substances are restricted:

1. Lead (Pb), maximum concentration tolerated: 0,1 %
2. Mercury (Hg), maximum concentration tolerated: 0,1 %
3. Cadmium (Cd), maximum concentration tolerated: 0,01 %
4. Hexavalent chromium (Cr VI), maximum concentration tolerated: 0,1 %
5. Polybrominated biphenyls (PBB), maximum concentration tolerated: 0,1 %
6. Polybrominated diphenyl ethers (PBDE), maximum concentration tolerated: 0,1 %

On 31 March 2015, delegated Directive (EU) 2015/863 (commonly known as RoHS 3) added the following substances:

1. Bis(2-ethylhexyl) phthalate (DEHP), maximum concentration tolerated: 0,1 %
2. Butyl benzyl phthalate (BBP), maximum concentration tolerated: 0,1 %
3. Dibutyl phthalate (DBP), maximum concentration tolerated: 0,1 %
4. Diisobutyl phthalate (DIBP), maximum concentration tolerated: 0,1 %

As a supplier of lubricants and cleaners, Bremer & Leguil GmbH is not directly affected by the RoHS Directive. Nonetheless, we are aware that some of our customers are part of the supply and production chain of electrical and electronic equipment, therefore we take the requirements of the RoHS Directive into account.

We confirm that the formulations of our Rivolta and CASSIDA products do not include any of the substances mentioned above.
